

# Contactless and very flexible Disinfectant dispenser with drip tray for all disinfectants

For the hygienic safety of your staff and your customers

Infectious diseases are transmitted mainly by aerosol infection when coughing, sneezing or when coming into contact with contaminated surfaces, e.g. door handles. Viruses and bacteria also reach the mouth, nose or eyes.

For this reason, it is important to disinfect your hands as soon as you enter and leave the toilet facility. Correct hand hygiene is necessary to prevent the viruses from spreading to surfaces or even to other rooms.

- Intuitive operation and attractive design
- Easy installation
- Contactless
- For alcoholic disinfectants and Disinfection gel
- Height of column: 1223 mm
