OUR COMMITMENT

For URIMAT, sustainability means using innovative, waterless sanitary products to sustainably improve people's quality of life and thus protect the earth's limited resources in the long term. In all of our activities we take economic, ecological and social aspects into account.

Our focus is on recognizing important technological and social trends at an early stage and developing suitable products and services for customers that generate added value for customers and protect our environment.

we What we do:

We are committed to minimising and preventing any adverse impact on the environment caused by our activities or products. We will maximise the efficient use of all our resources, especially in the use of water.

Reduce waste:

We continuously improve our products to reduce waste. For instance we avoid plastic bags for packaging everywhere we can; we use only cardboard packaging of recycled material and during our production no toxic chemicals are used.

Recycling:

Our high-tech plastic urinals can be recycled which is a great advantage compared to standard urinals. In our whole company we avoid a lot of printed papers due to digitalisation of processes and standards. We produce no toxic waste and recycle all our waste according to Swiss standards.

Cleaning products:

We produce and supply only biological cleaning products without any toxic ingredients. Our cleaner is totally biodegradable and consists only of microorganisms and water assuring no negative influence for the environment.

CO2-Reduction:

We are committed to reduce our Carbon footprint, i.e. our printed documents are CO2-neutral transported. Compared to standard urinals our low weight urinals save CO2 throughout the whole distribution chain. The energy to produce URIMAT urinals comes from Swiss hydroelectric power plants and thus from CO2 neutral sources. We prefer regional partnerships to avoid long transport ways.

Mobility

We aim to establish a pure electric vehicle fleet with all company cars with an "A" energy efficiency class. We reduce our travelling to a reasonable minimum and realize video calls with our partners/customers whenever possible.
