Ref.: URIMAT waterless urinals

Dear Sirs,

URIMAT waterless urinals have been installed at George Best Belfast City Airport since September 2011. Currently, there are 11x waterless urinals from URIMAT in operation at the airport.

With URIMAT, water consumption at the airport has been considerably reduced.

Furthermore, benefits to the urinal waste pipes have been noticed. Previous bad odours, waste pipe blockages and overflowing urinals have been eliminated. These issues were a reoccurring nuisance in the past with the former water-flushed urinals.

Cleaning of URIMAT waterless urinals has been received positively by the cleaning staff. Overall hygiene levels within the toilet facilities have been improved, also due to significantly lower splash-back accumulation beneath the urinals.

Chemical-free operation and cleaning of URIMAT is also in line with the environmental policy of George Best Belfast City Airport.

The integrated advertising display of URIMAT waterless urinals is a modern communication panel for the airport to provide information to commuters or to rent same out for third-party advertising.

Upgrading the toilets with URIMAT waterless urinals has been welcomed by commuters and visitors.

URIMAT is a cost-efficient, clean and hygienic urinal solution which we would recommend to other commercial enterprises with high urinal use.

Best regards,

**Howard Murdock
Facilities Manager
