Re: URIMAT Waterless Urinals at St. Mary's International School

Dear Christian,

St. Mary's has had 4 URIMAT urinals in operation in our high school gym building for over a year now, and I am pleased to report that we are very happy with them.

Waterless urinals were a new thing to our 800+ students (all boys) and faculty, so there were concerns initially that there might be some unpleasant smells associated with them.

Fortunately these fears turned out to be unfounded. By following the recommended normal cleaning routine, smells have never been an issue for us. We find the urinals to be quite hygienic actually, which is important in a school environment where bacteria can spread among students quickly.

Another concern was that since the fixtures are made of lightweight plastic, they might not hold up to the sometimes rough treatment that boys are noted for. This too has not been a problem. The very hard, non-porous surface of the fixtures makes them tough and easy to maintain.

Even more important than the cost savings on water and electricity that the school enjoys with these urinals, the URIMATs have turned out to be a wonderful educational tool as well. This ecological product has raised the awareness of our students, parents and faculty about energy and natural resource conservation. And they show that St. Mary's is proactively involved in protecting the environment.

Thank you for enlightening us about your unique and valuable product.

Best regards,

Kunihiro Takamichi
